## Overview

Congratulations!!

On buying AURUS BLE - 52 B

This lock can be installed in drawers and cabinets. The AURUS BLE – 51 has a built in Cr 800mAH 3v battery which should last you 8-10 months.

When the Battery Low warning will appear on your app you are required to change the batteries immediately.

You can have several locks in your house and control them with the app. The Max distance between the app & smartphone should be 15 ft.

Registration is very easy. And the 1<sup>st</sup> person to register the lock is the master. The master can grant & cancel access rights of a lock to any other user.

There can be only 1 master.

The master can grant access right remotely to another user via the internet, For example if you are travelling and want to grant access to the user at your home/office you can easily do so in a minute.

## Getting Started

Please install the mobile app: - “OKLOK”

Please search “OKLOK” in Google  
Playstore (Android) or APP store (IOS)  
to download the APP

Please note: - The Bluetooth must remain on while using the app and the lock.

## How to Install

## Battery Type :-

They battery used in the locks is Cr 800mAh 3v.
