Acetech Technologies:
Home Automation Simplified

The demand for home automation system as a smart choice is growing at a rapid pace. With new age home owners increasingly becoming technology savvy, automated homes as a concept is picking up across the nation. Smart home automation which once was thought as the limit of imagination is now being out ruled with the rise of intelligent home networking & home automation solutions. With the massive usage of internet and smartphones, it has become easier to access and control such smart home solutions with much simplicity and less botheration. Smart homes are now being looked as the technology of near future and many people have chosen such installations for comfort, convenience and security.
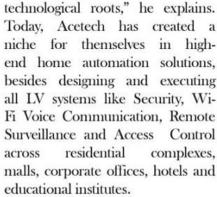

Over the years, a number of companies have come up with home automation options that do not cost much. Mumbai based Acetech Technologies is one such organization that works closely with architects and builders to design the best solutions in Fire detection, Access Control, Surveillance, Intrusion Alarms, Building Management and Home Automation. The company consistently tries to create value for their customers, by providing solutions with latest technologies which enable them to achieve excellence.

The journey of Acetech dates back to 1986 when Rakesh Sachdev, Managing Director,

> The silver lining of Acetech is their quick adaptability of future technologies that gives the customers a bang for their buck

established the business of security and telecom under the name of Eastland Business Corporation. "During that time, Indian electronic security was still very much in its infancy. We kept ourselves ahead of the race by embracing newer technologies. We partnered with leading security and automation companies and exploited the growing market to become a leading solution provider with strong

technological roots," he explains. Today, Acetech has created a niche for themselves in high-end home automation solutions, besides designing and executing all LV systems like Security, Wi-Fi Voice Communication, Remote Surveillance and Access Control across residential complexes, malls, corporate offices, hotels and educational institutes.

Talking about the different solutions offered by Acetech, Rakesh explicates that the company's services does not restrict only to the residential segment but expands to the commercial segment as well. "We have successfully interfaced Access Control with Lighting Controls and AC controls for many of our corporate customers. For residences, too we have done some great integration work," he adds. The silver lining of Acetech is their quick adaptability of future technologies that gives the customers a bang for their buck. "We have a dedicated application development team that is focused on developing newer applications to create that wow factor for our customers," he further adds.

Having mastered Home Automation, the company is all set to help new entrants to guide them set up their business. "We are rolling out a B2B model very soon with the help of an European automation company. In the near future, we aim to extend our solutions on a pan India basis," concludes Rakesh.H
